Anti-EVC2 antibody

Product overview

Cat. No.	ml161664
Package	25 µl/100 µl/200 µl
Storage	-20°C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol
Description	
Applications	Anti-EVC2 rabbit polyclonal antibody
Immunogen	ELISA, IHC
Reactivity	Synthetic peptide of human EVC2
Content	Human
Host species	1 mg/ml
Ig class	Rabbit
Purification	Immunogen-specific rabbit IgG
Purification	
Target information	
Symbol	EVC2
Full name	Ellis van Creveld syndrome 2
Synonyms	LBN
Swissprot	Q86UK5

Target Background

This gene encodes a protein that functions in bone formation and skeletal development. Mutations in this gene, as well as in a neighboring gene that lies in a head-to-head configuration, cause Ellis-van Creveld syndrome, an autosomal recessive skeletal dysplasia that is also known as chondroectodermal dysplasia. Mutations in this gene also cause acrofacial dysostosis Weyers type, also referred to as Curry-Hall syndrome, a disease that combines limb and facial abnormalities. Alternative splicing results in multiple transcript variants.

Applications

Immunohistochemistry

Predicted cell location: Cytoplasm or Nucleus

Positive control: Human cervical cancer

Recommended dilution: 50-200

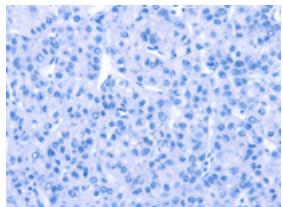

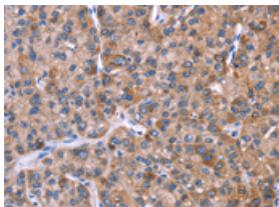

The image on the left is immunohistochemistry of paraffin-embedded Human cervical cancer tissue using ml161664(EVC2 Antibody) at dilution 1/40, on the right is treated with synthetic peptide. (Original magnification: $\times 200$)

Predicted cell location: Cytoplasm or Nucleus

Positive control: Human liver cancer

Recommended dilution: 50-200

The image on the left is immunohistochemistry of paraffin-embedded Human liver cancer tissue using ml161664(EVC2 Antibody) at dilution 1/40, on the right is treated with synthetic peptide. (Original magnification: $\times 200$)

ELISA

Recommended dilution: 2000-5000
